

## Privasoft AccessPro

Privasoft has been supplying solutions for document disclosure under Freedom of Information (FOI), Data Protection Act (DPA) and Environmental Information Requests (EIR) for 14 years. They have implemented systems in all levels of government, including central government, local authorities, police forces and NHS Trusts.

Privasoft's AccessPro range is Privasoft's latest generation of product, it provides powerful case management, information redaction control, collaboration and release management for all forms of disclosure and access to information processes.

AccessPro Case Management is an automated case management system that provides you with the tools and information needed to manage the critical factors necessary to drive FOI/DPA/EIA and other disclosure process improvements successfully across your organisation.

AccessPro Redaction is a fully integrated imaging system that supports multiple legislations and provides all of the image, document/page and redaction status data in one place. Extensive search and audit functions provide full details across multiple images and documents. The easy-to-use interface simplifies many complex tasks and batch processes not found in other tools. Costly and time-consuming manual redaction procedures are being eliminated providing a more efficient, reliable, secure and auditable redaction process.
